# U-SERIES POLISHING PAD

## Available sizes:

34/40 mm | 55/70 mm | 80/100 mm | 130/150 mm | 150/180 mm

## Fastening:

Velcro

## Applications:

CAR WOOD YACHT METAL

Made of selected foams for polishing industry. Open cell foam structure (O.C.F. TECHNOLOGY) increases friction and stabilizes temperature at the same time. Relevant thickness and side shape provides safe work in hard-to-reach places.

ALWAYS WEAR SAFETY GLASSES!

## Size/ hardnesses

## R-DA POLISHING PAD

### Available sizes:

125/140 mm | 80/90 mm

### Fastening:

Velcro

### Applications:

CAR WOOD YACHT METAL

The R-DA polishing pad is designed for use with dual-action polishing machines. Its size and shape gives a high working comfort, and allows to operate smoothly while maintaining accuracy, on both curved and flat surfaces. The hole in the middle of a pad is created for centralizing on a backing plate, as well as providing cooling. Pads are made out of high quality foam and durable Velcro. They are designed to work at high speed and characterised by their extreme durability.

## CLASSIC POLISHING PAD

### Available sizes:

150x25 mm | 135x25 mm | 80x25 mm | 50x25 mm

### Fastening:

Velcro

### Applications:

CAR WOOD YACHT METAL

The HONEY CLASSIC professional buffing pad is characterised by its high quality and performance precision. It is made out of high-quality materials, making it suitable for repeated use. It is designed for mechanical treatment on automotive paints and coatings of various types, in conjunction with coarse polishing pastes such as HONEY „2“. It can be used for both wet and dry applications, with a speed range of between 600 and 2,600 RPM.

# EXTREME POLISHING PAD

## Available sizes:

150/170 mm | 125/140 mm | 80/100 mm

## Fastening:

Velcro

## Applications:

 CAR  WOOD  YACHT  METAL

The specially designed surface of the HONEY EXTREME buffing pad gives high cutting power, making it ideal for extremely hard coatings, metal and wood. The dual-layer construction increases the shock absorption between the machine and the pad.

A suitable polish, such as HONEY „2“, will help you get the desired result. The pad is designed to work with rotating equipment up to 2.600 RPM.

## GOLD POLISHING PAD

 **Available sizes:**  
150x25 mm

 **Fastening:**  
Velcro

 **Applications:**  
 CAR  WOOD

Cut

Finish

**HONEY GOLD** is a new pad for car detailing. Its surface consists of octagonal blocks where each edge helps to reduce time taken for the paint to reach ideal condition. It also makes it easier to control the operating temperature and reduce the risk of overheating significantly. There is increased cooling and better heat transfer from the paint. The small, independent working surfaces for a polish minimise traces of spin and facilitate precise handling over the entire paint surface.

The **HONEY GOLD** pad provides easier, faster and more comfortable way of achieving the perfect gloss finish, even for the most demanding surfaces.

ALWAYS WEAR SAFETY GLASSES!

## HILLS POLISHING PAD

 **Available sizes:**  
80/25 mm | 150/25 mm

 **Fastening:**  
Velcro

 **Applications:**  
 CAR  WOOD  YACHT  PLASTIC

**HONEY HILLS** is an innovatively shaped pad, designed specifically for finishing and car detailing. The working surface of the **HONEY HILLS** COMBination pad is covered with small "hills", which serve to retain and distribute polishing paste evenly over the polished item, and prevent excessive splashing. Paste is applied by filling one or more of the voids between the hills.

The **HONEY HILLS** pad saves time and reduces the consumption of abrasive by holding it within the pad.

# ULTRA CUT WOOL PAD

## Available sizes:

75x80 mm | 130x150 mm | 150x170 mm

## Fastening:

Velcro

## Applications:

CAR WOOD YACHT METAL STONE GLASS PLASTIC

Cut

Finish

Cutting pad made of high quality wool. It's structure is 50% natural wool and 50% synthetic. The combination of these two fibers eliminates the clogging of the pad and ensures that its structure is maintained for a long time.

The top of the pad is orange rubber, which minimizes vibrations during work. The hole used in the middle gives better cooling during work and also makes it easier to evenly apply the pad on the backing plate.

High cutting power thanks to 50% natural wool in the structure.  
40% less matte effect during cutting thanks to 50% synthetic wool in the structure.

Sizes/ Fastening	Velcro
75/85 mm	UC7580
125/135 mm	UC1315
150x160 mm	UC1517

## SHORT WOOL PAD

### Available sizes:

75x80 mm | 130x150 mm | 150x170 mm

### Fastening:

Velcro

### Applications:

CAR WOOD YACHT METAL STONE GLASS PLASTIC

Honey Combination **SHORT WOOL PAD** – A polishing pad made in 100% of natural wool, open-cell foam (O.C.F) and a rubber interface, which reduces vibrations. The pad is designed for Dual Action machines. Product dedicated to the first step of polishing.

Advantages of the product:

- ✓ natural fibre
- ✓ easy to clean
- ✓ very durable
- ✓ a low temperature of polishing thanks to the usage of O.C.F technology

Sizes/ Fastening	Velcro

## 2 FACE FIBER

### Available sizes:

80x80 mm | 135x150 mm | 160x170 mm

### Fastening:

Velcro

### Applications:

CAR WOOD YACHT METAL STONE GLASS PLASTIC

Cut

Finish

New microfiber pad created for one step.  
**2 FACE FIBER** has microfiber in two colours:

- white - aggressive
- black - for finish.

20 % shorter fibers don't allow for clogging of the pad and cleaning is faster and easy.

The combination of cutting and polishing fibers in one product allows us to use one pad for various steps, like cutting and then polishing.

The pad works perfectly with **HONEY Polishing Compound 2**.

The BEAST – extremely aggressive polishing pad. Build in 100% of synthetic fiber but with a unique composition and structure, different from standard microfibers. It combines two types of short synthetic fibers – white and blue, thanks to them, despite huge cutting power it leaves a faultless finish. The BEAST is the heaviest pad in Honey Combination offer, only comparable with Ultra Cut Wool Pad – however, the significantly shorter fibers and different structure of the pad transfer to greater cleanliness during work and maintaining the compound longer on the working surface of the pad.

## POLISHING COMPOUNDS

### Available capacity

1 kg | 0,5 kg | 0,25 kg

### Applications:

CAR WOOD YACHT METAL STONE GLASS

**1+ - Hard Cutting Compound** with unbreakable grain. The best solution for the hardest clear coats. Hard and consistent grain leaves a poor finish effect. **Contains NO wax and silicone.**

**1 - Cutting Compound** for most paints usage. Due to its unique formula it eliminates even thick scratches leaving acceptable finish effect. Water based polish. **Contains NO wax and silicone.**

**2 - Polishing Compound** with reduced cutting power for great finish effect. The perfect solution for the correction after ONE STEP stage or as Polishing step for full pain correction. Water based polish. **Contains NO wax and silicone.**

**3 - Finishing Compound** dedicated to hard paints. Perfect for removing tarnished surfaces, holograms and small paint defects, making the perfect finish effect. Water based polish. **Contains NO wax and silicone.**

**3+ - Light Finishing Compound AntiHolo type.** It the only function is to make perfect and flawless surface. Dedicated to softer paints where achieving perfect finish effect is very difficult. Water based polish. **Contains NO wax and silicone.**

## ELASTIC BACKING PLATE

### Available sizes:

30x10 mm | 50x10 mm | 75x25 mm | 125x25 mm | 150x25 mm

### Fastening:

M14

### Applications:

CAR WOOD YACHT METAL STONE GLASS

A robust, flexible disc with specially selected foam, for buffing pad or sandpaper use.

The FLEXIBLE Backing Plate and a buffing pad are the perfect combination for a wide range of polished surfaces, reducing the risk of overheating and paint damage. The disc's special design uses a high-quality white foam that allows to pressure evenly from all sides. This lets you to regulate operating temperature of the buffing pad.

The disc is attached to rotating equipment, using an M14 thread.

## HONEY INTERFACE PAD

 **Available sizes:**  
150x10 mm

 **Fastening:**  
Velor/Velcro

 **Applications:**  
 CAR  WOOD  YACHT  METAL  STONE  GLASS

A very high quality interface pad using strong, durable Velcro, open-cell foam and specially selected velour, which allows you to work with a high degree of precision. The structure, hole pattern and specially selected adhesive increase the service life in a dusty environment, as well as increasing the tensile and shear strength by 10%. The pad is also highly resistant to temperature fluctuations in a short work term. The interface pad is a key element in the precision grinding process, using abrasive papers of different coarseness.

## CONE POLISHING PAD

 **Available sizes:**  
85x30 mm | 50x30 mm

 **Fastening:**  
Pin / M14

 **Applications:**  
 CAR  WOOD  YACHT  METAL  STONE  GLASS  PLASTIC

A cone-shaped buffing pad for hard-to-reach places. The pad is made from specially selected high quality foam. Its shape lets you access hard-to-reach places from different angles, giving versatile and universal application.

Suitable for polishing items such as alloy wheels, door recesses, pillars, boot profile recesses, silencers and bumper halogen profiles.

The cone is a durable product, designed for repeated use.

Fits any rotating equipment with a standard chuck. Up to 2,000 RPM.

## APPLICATOR MULTICOLOR

**Applicator Honey COMBination 3 colours.** Made of 2 polishing foams and one intermediate foam.

Yellow, hard foam is used for polishing of the surface with light abrasive compounds. Black foam is used for the final touch of the surface with finishing compounds and for the application of wax.

## EXHIBIT YOUR PRODUCTS!

Do you want to exhibit your products?

We provide our distributors possibility to order special stands which enable to display polishing materials so as to attract potential customers.

If you are interested in a better exposition of your products, ask your local sales manager about HONEY COMBination display stand.
